Saim Shamoun is nine years old and studying in Nursery class. He has no siblings. From his childhood, he is physically and mentally not fit. His parents are always worrying about his health and trying to get him treatment. His father is working in a university as a cleaner. His income is very low. They are living in a rental home. His mother's name is Shabana. She is a housewife. They do not have any source of money to pay for education.

The Agape Pakistan Charitable Foundation we partner with is helping this boy for his education using the foundation's limited resources. We need sponsors for this child to help provide the \$360 needed for annual support for him education, basic health care, and Sunday school. We ask you to prayerfully consider helping this child to be a good Christian citizen of Pakistan.
